SUMMARY

Entry-level Data Analyst and Data Science enthusiast with strong knowledge of Python and data analysis libraries. Skilled in data cleaning, preprocessing, and visualization using Pandas, NumPy, Matplotlib, Seaborn, Power BI, and Tableau. Passionate about extracting meaningful insights from complex datasets. Eager to apply academic knowledge and project experience to real-world analytical challenges.

EDUCATION

Master of Computer Applications (MCA) – Pursuing September 2025 – June 2027
MIT CSN, Chhatrapati Sambhajinagar

Bachelor of Computer Science (BCS) | 83.8% August 2022 – April 2025
Saraswati Bhuvan College, Chhatrapati Sambhajinagar

TECHNICAL SKILLS

- Programming:** Python, SQL (Basic)
- Libraries:** Pandas, NumPy
- Visualization:** Matplotlib, Seaborn, Power BI, Tableau
- Concepts:** Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization
- Tools:** Microsoft Excel, Jupyter Notebook, VS Code, Google Colab

PROJECTS

1. Used Cars Cost Prediction

- Performed data cleaning and preprocessing on a real-world used car dataset to handle missing values, outliers, and categorical variables.
- Conducted exploratory data analysis (EDA) using Pandas and NumPy to identify key features influencing car pricing.
- Created insightful visualizations using Matplotlib and Seaborn to analyze price trends, brand distribution, and feature correlations.
- Derived actionable insights on factors affecting car valuation such as mileage, age, fuel type, and brand.

2. Sales Forecasting

- Analyzed historical sales data to identify trends, seasonal patterns, and performance metrics across product categories.
- Performed data preprocessing including handling missing data, normalization, and feature engineering using Python libraries.
- Developed visual dashboards using Matplotlib and Seaborn to communicate sales performance and business insights effectively.
- Gained hands-on experience with end-to-end data analysis pipeline from raw data ingestion to insight generation.

3. Retail Sales Analytics (D-Mart Dataset)

- Analyzed D-Mart retail sales data to uncover key business insights and sales trends.
- Performed data cleaning and preprocessing on transaction-level data.
- Created data visualizations for sales by category, profit by category, top 10 products by sales, and region-wise sales using Matplotlib and Seaborn.
- Built an interactive dashboard using Streamlit to showcase KPIs and visual insights.
- Generated actionable insights to improve sales strategies and inventory management.

CERTIFICATIONS

- Data Science Internship – Acmegrade** (10 Feb 2026 – 10 Apr 2026)

ADDITIONAL INFORMATION

Languages: English, Hindi, Marathi | **Interests:** Data Analysis, Visualization, Problem Solving
